## Education

### Buddha Institute of Technology

Bachelor of Technology in Computer Science and Engineering specialization with AIML

Aug. 2024 – May 2028

Gorakhpur, Uttar Pradesh

## Relevant Coursework

- Data Structures
- Java Full Stack
- Development
  - Algorithms Analysis
- Database Management
- Artificial Intelligence
- Systems Programming
- Computer Architecture

## Projects

### AI-Based Online Voting System | *HTML5, CSS, JavaScript, VS Code*

August 2025

- Developed an AI-Based Secure Online Voting System with Aadhar-based voter authentication to ensure that only verified users could access the voting portal.
- Designed and implemented **separate Admin and Voter panels** for secure election management, voter registration, and result monitoring.
- Built the backend using a **database of registered voters** (sample dataset of 5 users) to manage authentication, voting records, and user information.
- Implemented a responsive web interface with a focus on secure login, role-based access control, and a streamlined voting workflow.

### Suraksha-AI | *Python, HTML5, CSS, JavaScript*

January 2026

- Developed **Suraksha-AI**, a web application focused on providing a quick emergency **SOS alert** feature for user safety.
- Designed a simple and responsive interface that enables users to **generate an SOS request** with minimal steps during emergencies.
- Implemented the backend logic to process and manage SOS requests, ensuring reliable alert generation.

### AI-Video Generator | *Python, FastAPI*

July 2026 – Present

- Developing an **AI Video Generator** that converts user prompts into short AI-generated videos through an automated generation pipeline.
- Integrating **Python, FastAPI, and AI models/APIs** to handle prompt processing, media generation, and backend services.
- Designing a scalable backend architecture with REST APIs to manage video generation requests and processing workflows.
- Applying modern software engineering practices, including **Git, virtual environments, API integration, and modular project structure**, to build a production-ready AI application.

## Technical Skills

**Languages:** Python, Java, C, HTML/CSS, JavaScript

**Developer Tools:** VS Code, Google Cloud Platform

**Technologies/Frameworks:** GitHub

## Leadership / Extracurricular

### AI-Based Secure Online Voting System

Techyuva 10.0–2025

Buddha Institute of Technology

- Winner of TechYuva 10.0 (2025) for developing an innovative technology-based solution in a competitive environment.
- Demonstrated strong problem-solving, teamwork, and project development skills while presenting the solution to judges.

### Suraksha-AI

Hackathon–2026

Buddha Institute of Technology

- Participated in a **2026 Hackathon**, collaborating with a team to design and develop a solution within a limited timeframe.
- Applied full-stack development, AI concepts, and collaborative problem-solving to build a functional project under deadline constraints.
